

Guidelines for Labeling Combination Plantings

Section B - "Plant Small Gardens" Eligible for Grower's Choice Award

Grouping of 3 or more botanically different plants with similar cultural requirements; see *HB* p. 59 for additional information. All plants to be individually numbered in the container with corresponding number and botanical name on a 3" x 5" card placed with exhibit.

Here are two examples for labeling plants.

They would each be accompanied by a 3x5 card listing the cultivar for each number.

DISH GARDEN: In the example on the left the exhibitor used plastic plant stakes to label the various plants by number.

PLANTER: In the example on the left the exhibitor used skewers and glued a number to the top of each one.

The same process would be used in a **Terrarium**.
